- 2) For CSCI2033, developed 3 homework sets that help the students to perform basic matrix computations in Python—which is gaining dominance in advanced courses, academic research, and industrial jobs, vs. the past iterations that used Matlab. The homework sets were adopted for later iterations of the course (e.g., F23 by Bernardo Bianco Prado)
- 3) For the DSCI8970 seminar, which is the cross-listed version of the CSE DSI Machine Learning Seminar Series, oversaw main activities such as seminar planning and speaker invitation/hosting
